

COMPANY PROFILE

Founded in 2008, ProGen Business Solutions is an IT company operating in the Business Intelligence (BI) & Analytics domain with core focus in the BI Products space. Founding team at ProGen comes from Oracle Corporation and carries 18 plus years of experience in the BI & Analytics domain. Business Intelligence products from ProGen provide a superior value proposition to customers in form of Ease of use, Quick Deployment, Simple & Interactive User Interfaces and Lower Cost of Ownership.

pi – BUSINESS INTELLIGENCE SUITE

pi is an end-to-end Business Intelligence Suite from ProGen Business Solutions that aims to simplify the historical complexity associated with Business Intelligence Reporting Tools and delivers highly customizable Business Intelligence Solutions in an extremely simplified format. Business Users and IT Teams find pi to be their preferred BI Reporting tool as it requires minimal user training and can be deployed within weeks without any specialized IT resource requirements or dependency on 3rd party. With complete Web based User Interfaces, pi is suitable for all kinds of Business Intelligence users ranging from Departmental users to Enterprise-wide users who wish to collaborate in Real time for taking better & more informed business decisions. OEM software companies looking forward to embed Business Intelligence Reporting Layer with their existing Software Products would find pi as the most suitable & practical option due to its open interface based architecture and support for multiple Databases.

SERVICES

We are highly focused on delivering high quality BI Solutions to our customers and our expert team of functional & technical consultants work closely with the customers in making each installation a success story. End-to-end services are offered to customers in the BI domain such as ETL Layer Design, BI Consulting, Implementation, Training, Post Production Support, and other Data Integration related services. Our dedicated Support team helps customers with prompt resolution of issues and any other product enhancements required during the product life-cycle. In all our product installations, we work towards delivering a BI Solution that has higher user adoption and can be easily used by business users without any support from the IT Teams.

CHANNEL PARTNERS

To provide our customers with a wide variety of domain expertise while configuring their BI Solutions, we have a strong channel partner network in different verticals and is continuously growing. Our channel partners are highly skilled and trained on our BI Products to ensure a smooth and successful implementation for our customers.

TEAM PROFILE

Team at ProGen Business Solutions is highly qualified and comes from reputed B-Schools & Engineering Colleges. Our team carries rich expertise in the Business Intelligence & Analytics domain across different business verticals. The vision of our leadership team to deliver high quality BI Products at a reasonable price is achieved with help of our strong R&D team that works closely with the Project delivery team in understanding the customer requirements and productizing the required critical features.
